

ZTP Thermal & Power

100G Liquid-Cooled Switch Available Now

Powered by ZTP Thermal & Power

Overview

The DynaNET 100G-01 is a high performance switch for Automotive and rugged applications, where extreme levels of performance, reliability and compactness are required. Delivers 16x 40/56/100GbE ports over QSFP28, and with breakout cables up to 32x 50GbE or 64x 10/25GbE ports for a total throughput. FS 100G Switches offer high programmability and scalability, designed for large enterprises and hyper-converged infrastructure (HCI) networks. Learn more!
The VX6940 is a 6U VPX non-blocking L2/L3 switch built around a Broadcom® 72 × 10GbE port high-density switch with 100G uplinks capability offering 720 Gb of I/O bandwidth. It also has front panel I/O which can be used to connect the system to external data sources. As a result of continuous research and development efforts in energy-saving and sustainable solutions, Accton introduced a two-phase immersion-cooled 100G switch module for high-speed cloud computing. The density of data center deployments keeps increasing to satisfy the growing demand for.
