

12-core terminal optical module

Overview

SNAP12 is a 12-channel pluggable parallel optical transmitter or receiver module with a standard chassis mountable MPO interface. These are well suited for high-bandwidth commercial aerospace systems with the added benefit of reducing aircraft wiring and system weight and. Haile MPO Pre-terminal Module MPO-MTA12LC is a high-performance 12-core 10 Gigabit multimode OM4 fiber optic patch panel box. DIN Rail Fiber Optic Termination Box FTTH 12 Core is available for the distribution and terminal connection for various kinds of optical fiber system, especially suitable for mini-network terminal distribution, in which the optical cables, patch cores, or pigtails are connected.
