

4G Photovoltaic Data Module

Grid Cable for
marine and offshore
applications

Overview

This 4G communication module, compatible with the ASW-T and ASW-K-LT series inverters, provides reliable access to data from your photovoltaic installation. It enables monitoring of the inverter's operation via the AISWEI Cloud platform and a dedicated mobile application. To ensure stable data transmission, Huawei recommends that a 4G Dongle be installed in areas with stable mobile signal (2G signal ≥ 4 bars, 3G/4G signal ≥ 3 bars). 3rd-party management system shall support the communication protocol used on Huawei Smart Dongle. This data logger utilizes cellular technology to connect to LuxCloud, rapidly transmitting real-time operational data from both photovoltaic power stations and energy storage batteries to the LuxCloud monitoring system.
