

AXM Distribution Box

Overview

With full-plastic shell, AXM series distribution box is used to accommodate neutral terminal block, earthing terminal block and DIN rail, and can work together with Tengen module distribution protection products. High-quality materials and robust product designs ensure a reliable connection, signal transmission and power. XM Cabinet is widely used in lighting distribution systems of power station, transformer station, factory, mine, hotels, apartment, buildings, port, railway station, airport, warehouse, hotels etc. IP65 Surface distribution boxes These IP65 surface distribution boxes are designed for indoor and outdoor use and are made with high-quality halogen-free plastic materials. They have a modular capacity ranging from 4 to 54 modules and provide ample space for wiring. This protocol, standardized according to ISO 16484-5, simplifies communication between devices from different manufacturers, from the fieldbus level to the management level.

AXM Distribution Box

PASSIVE DISTRIBUTION BOXES

Exact12 distribution boxes for safety applications connect up to eight safe actuators in addition to eight standard sensors. They meet the EN ISO 13849-2 requirements.
