

# Advantages of jumper-free optical junction boxes

## Overview

---

Its main function is to achieve the connection between different optical fibers without the need for additional jumper connections (i. "jumping"), thereby simplifying the wiring and management process of optical fibers. These enclosures are essential for protecting fiber connections from environmental hazards and physical damage. According to our (Global Info Research) latest study, the global No-Jump Optical Cable Junction Box market size was valued at US\$ 121 million in 2024 and is forecast to a readjusted size of USD 150 million by 2031 with a CAGR of 3.

## Advantages of jumper-free optical junction boxes

---

### **Box-type jumper-free optical cable transfer box (stainless steel)**

After the optical cable is introduced into the optical cable transfer box, after being fixed, terminated, and distributed, fiber jumpers are used to connect the trunk layer optical cable and the distribution layer
