

# Angola High Voltage Distribution Box

## Overview

---

The aim is to install and operate an Angolan engineer ProMarks and Swiss commodity trader Trafigura signed a memorandum of understanding with the Government of Angola to develop a 2GW Connectivity Project, a high-voltage direct-current line to carry surplus electricity. Learn about the market conditions, opportunities, regulations, and business conditions in Angola, prepared by U.S. agencies' professionals. Increasing electric power availability to diversify the economy and meet the 7-Dominion provides end-to-end management, from structuring the financing to deploying the infrastructure, the construction of a 253 km electricity transmission line in Angola. The National Transmission Network (RNT in its Portuguese acronym) will continue to grow in the post-2017 period and will interconnect in 2025 all of the country's Provincial capitals.
