

Angola Solution Liquid-Cooled Switch 200G

Angola Solution Liquid-Cooled Switch 200G

Hardware -- NVIDIA DGX GB Rack Scale Systems

Hardware # DGX Grace Blackwell rack scale systems are rack scale solutions for graphics processing units (GPUs) connected by NVLink through the

Immersion Cooling Solution for Sustainable AI Data

Immersion cooling stands out as the most efficient solution in liquid cooling technology. With strong heat dissipation capacities of up to 100kW/rack, it is ideal

[Read More](#)

What Does it Take to Make the Switch to Liquid Cooling?

The liquid is circulated through liquid-cooled servers, and the heat is radiated from the liquid through an external heat exchanger to the room. The room air-cooling infrastructure is utilized to remove the

Advanced Liquid cooling Solutions for Angola's Pharmaceutical

Liquid cooling removes heat more efficiently than air, allowing electronic control units to run at peak performance without thermal throttling, even in Angola's high ambient temperatures.

The NVIDIA GB300 NVLink Liquid-Cooled Switch

NVIDIA GB300 NVLink Switch Tray 1 An especially ingenious aspect of the design lies in the fact that, although the NVLink switch chip is liquid-cooled,

Redefining liquid cooling from the server to the switch

Liquid cooling, and Precision Liquid Cooling in particular, is at the forefront of this journey. Whether it's reducing the environmental footprint of data
