

Anti-deformation cable trays

Overview

These trays offer superior strength, corrosion resistance, and durability, making them ideal for harsh environments, high-load applications, and long-term installations. They are available in different designs, including Ladder Type, Perforated Type, and Solid Bottom to meet. Legrand's offer of global solutions for wiremesh cable trays (and accessories) is one of the most complete on the market. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Such deformations can lead to reduced functionality, safety hazards, and shortened service. Built from high-quality materials, these trays provide excellent support and organisation for cables, ensuring safety and efficiency in any setup.
