

Base station Huawei optical module

Overview

Supports multi-mode RATs, GPS/GLONASS/Galileo/BDS, and high-speed optical transmission. The DBS5900 is a wireless access device for the eLTE wireless broadband private network solution. It provides wireless access functions, including air interface management, access control, mobility control, and user resource allocation. a: The multi-mode satellite card can work in multiple modes, which can be set when the GNSS Working Mode parameter is set. b: When the UMPTga is used in an NR single-mode base station or a multimode co-MPT base station with NR and two optical transmission ports are connected at the same time, the. JEMSdata, acquired by 1COM in 2007, buys sells and trades network and telecom equipment worldwide in over 50 countries; Huawei Core Network, UMG8900, MSOFTX3000, SGSN9810, Huawei OptiX OSN Optical Transmission Switching, and Huawei Wireless; 2G, 3G, 4G/LTE to 5G.
