

Cable trays installed against the wall are aesthetically pleasing

Overview

Aesthetics: Cable trays are not as aesthetically pleasing as other cable management methods, and may not be suitable for installations where appearance is a concern. When completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is bent the minimum bend radius for cables as they exit the bottom of the cable tray. Cable trays are aesthetically appealing in addition to being functionally robust, ensuring that your wiring doesn't stick out like a sore thumb in your office/commercial space. This can be especially useful in large buildings or facilities with complex cable routing requirements.
