

Canadian Core Switch 100G

Overview

Omada Campus S7500-32C is a high-performance L3 managed switch tailored for the core layer, featuring L3 routing, ultra-fast 100 Gbps wired speeds, stacking options, and redundant power supply modules. It includes 32× 100 Gbps QSFP28 slots, physical stacking ability, and centralized management. FS 100G Switches offer high programmability and scalability, designed for large enterprises and hyper-converged infrastructure (HCI) networks. Learn more! Two Flash chips are used to store the system boot program for hardware-level boot redundancy, avoiding device failure caused by a failed Flash chip. Enterprise SONiC based 32 port 100G QSFP28 aggregation core switch for aggregation spine architecture, which line rate L2 L3 up to 3.92Tbps switching capacity with 48×10G SFP+ ports, 2×40G QSFP ports, and 4×100G.
