

Circular Cable Management Frame

Overview

Adjustable cable management frame suitable for both small and large closures. Accessories for flexible cable entry in enclosures and case systems and efficient cable routing in enclosures and cases with a 482. It is equipped with a sock that closes tight around the cable and allows for it to be moved around like a "joy-stick" in the opening without endangering the IP, so it works extremely well with cables passing through at an angle. We stock complete systems with all necessary accessories and fittings for various installation environments.

Circular Cable Management Frame
