

Company that sells communication power systems

Overview

The communication power system market exhibits a moderately concentrated landscape, with a handful of major players—including Vertiv, Huawei, Delta, and Eaton—holding significant market share. However, the presence of numerous regional and specialized players prevents complete. EnerSys® is the only company focused on the entire power ecosystem, using power and energy storage systems to create solutions dedicated to powering the modern network, lowering energy and labor costs while maintaining the world-class network reliability we've come to depend on. The Communication Power System market is poised for significant expansion, propelled by the widespread rollout of 5G infrastructure, the escalating adoption of cloud computing and data centers, and the robust growth within the renewable energy sector.
