

# Comprehensive container rack weight weight

## Overview

---

ISO 668 specifies 36,000 kg as the standard rating; many flat racks are rated higher (e. Please note: The specifications supplied here are only meant to serve as an example for containers in Hapag-Lloyd's container fleet, as containers vary depending on their particular manufacturer. Should you have special equipment-related requirements for your shipment, we kindly ask you to contact. Whether the goods are loaded in bulk, bags, or cartons in standard containers, or out of gauge goods and project cargo on flat racks, or fruit, meat, fish and other goods requiring temperature control in reefer containers, cMA. Explore our range of container types, each designed with varying dimensions (in mm), container capacity, tare weight, and payload specifications to accommodate different cargo requirements. Flat rack containers are especially suitable for heavy loads and cargo that needs loading from the top or sides, such as pipes and machinery.
