

Connection method of fiber optic switch

Overview

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. Download the Application PDF In this article, we'll explain how to connect multiple Ethernet switches using fiber optic cables and the equipment required for this to work. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other.
