

Core Switch for Transportation Engineering

8-Port PLC Fiber Splitter Box

12-Port SC Fiber Splitter Box

Size: 235*215*75mm
Material: ABS, IP65,

Overview

Core switches are the focal point for traffic control between access and distribution switches. They perform a vital function in ensuring the network's reliability and stability because they are in charge of routing data across the network infrastructure in a reliable and timely. What is a Core Switch?

A core switch is the primary switch installed at the backbone of a layered or hierarchical network. Typically they provide multiple CPUs (Performance CPU, Management CPU) and require multiple cascaded switches to provide sufficient switch ports and redundancy.

Core Switch for Transportation Engineering

What Is a Core Switch?

Unlike access or distribution switches, a core switch is optimized for Layer 3 performance, modular scalability, and redundancy. In smaller networks, it may be combined with the distribution layer in a
