

# **Cuba AI Server 100G**

## Overview

---

This MCP server provides persistent, intelligent memory using knowledge graphs, Hebbian learning, GraphRAG, and robust anti-hallucination grounding. Cuba-Memorys functions as a sophisticated Model Context Protocol (MCP) server, equipping AI agents, especially coding assistants, with essential. AI servers accelerate model training and real-time inference, delivering powerful computing with CPUs, GPUs, and specialized AI accelerators. Their scalable and efficient architecture enables businesses to run AI workloads faster and more effectively. Advanced cognitive reasoning engine for AI agents implementing a 6-stage cognitive pipeline, anti-hallucination, MCTS quality enforcement, Process Reward Model, bias detection, metacognitive analysis, persistent thought sessions, and cross-MCP memory symbiosis.
