

Cuba Gtys Optical Cable

Overview

GYTS (Steel Tape Armored) is an outdoor loose tube fiber optic cable designed for harsh environments. It features corrugated steel tape (CST) armor for mechanical protection and a waterproof PE sheath, making it suitable for aerial, duct, and direct burial installations. Suitable for duct and direct buried application with fiber counts from 2cores to 432cores for both singlemode and multimode. GYTS Fiber Optic Cable: A Robust Solution for High-Performance Data Communication In the era of information and communication technology, the demand for high-speed and reliable data transmission has surged exponentially.

Applications
Description of A Standard GYTS Fiber Optic Cable
Features
GYTS Optical Cable
What Is Differences Between GYTS Optical Cable and Gyta Optical Cable?
GYTS cable is universal optical cable; it can be used in aerial, duct and direct-buried while GYTA can be used in aerial cable and duct cable not in direct-buried cable. The S in GYTS refers to steel strip which can sustain large pulling force, the A in GYTA refers to Aluminum strip which has better anti-rust and moisture resistance than steel strip, See more on [mefiber optic 4,7/5\(3\)HuaDong Cable Group](#)
