

Czech Low-Power Optical Module SFP

Overview

Experience high-performance, reliable fiber connectivity with our Optical Transceiver Module, designed for long-haul data transmission. This optical module supports 10Gb/s rates over 40km with low power consumption and robust environmental adaptability. TP-LINK's TL-SM321A adopts the latest standard 1000Base-BX, transmission over a single strand of fiber, with one different wavelength going in each direction. This product need to use in pair and match up with fiber converter and optical Ethernet switch with SFP port, it can be used in Ethernet, telecom and.
