

Data Network Optical Module Distance

Overview

SFP distance refers to the maximum effective range over which an SFP optical module can transmit data while maintaining signal integrity. An SFP (Small Form-factor Pluggable) module transmits data over fiber using specific wavelengths and power levels, which directly influence how far the signal can travel before degradation occurs. LR (Long Range): Up to 10 kilometers, using single-mode fiber for wide-area and long-distance links. Driven by AI workloads, cloud services, and large-scale data centers, 400G Ethernet has become a mainstream interconnect speed for modern networks.

Data Network Optical Module Distance

ECI Networks Dell QSFP+ Module 407-BBBY-ECI , Cendirect

ECI Networks Dell QSFP+ Module - For Data Networking, Optical Network - 1 x 40GBase-SR4 Network - Optical Fiber40 Gigabit Ethernet - 40GBase-SR40.15 km (0.09 Mile) Maximum Distance
