

Dimensions of Telecommunication Shelters for Data Centers

Overview

Here's a practical guide based on international standards to help you design efficient and standards-compliant telecom spaces. Telco shelters are essential for housing telecommunications equipment, providing protection from environmental elements and ensuring the reliability of network operations. To provide flexible and seamless network service, telecom operators have to make their best to deploy mobile network as fast as possible in some special scenarios, such as network reconstruction after disaster or temporary expansion at hot spot. Lightweight, ruggedized, and a superior value, Datacomm Pro is exactly the type of shelter today's growth-minded telecom operators, carriers, and edge data operators need. Our engineered protective building solutions comply with current editions of IBC, UBC, SBC, BOCA, NEC, ACI.
