

Distribution Box CMT

Overview

4-way splitter boxes are used to distribute electrical power in a construction project. They are typically installed in the ceiling or walls and have four outlets, allowing power to be directed to multiple locations within a room or area. External dimensions 290 x 200 x 95 mm Protection Degree (IK) IK07 Impact shock resistance Medium Insulation class Class II Fire resistance (GWEPT) 650 °C Heat resistance (Ball pressure) 70 °C Free of halogens Yes CE marking. Murrelektronik supplies a comprehensive range of distribution boxes: They create optimum installations for any application and are cost-effective, reliable, and space saving solutions! Õ Saves space! Fewer terminal blocks, fewer cable entry systems, and fewer terminal boxes in the field are. Our passive sensor actuator boxes consist of plastic, standardised M8 and M12 plug-in slots, and a wide range of connection options for the trunk cable. They centralise connections to ensure flexibility and that the installation is up to date.
