

Distribution box connection location

Overview

Wiring Direction: Wiring between the main circuit breaker and each branch circuit breaker in the box generally goes on the left, and the wiring out of the distribution box generally goes on the right. Connecting a distribution box involves several steps to ensure proper electrical flow. Let's see what factors need to be taken care of when choosing the installation place. To find it quickly, look for a rectangular gray metal box about the size of a medicine cabinet, often positioned close to. The installation location should be dry and ventilated, away from flammable and explosive substances, corrosive substances, and easy to maintain in the future.
