

Distribution box protection light red

Overview

Red indicator window (Defect): If you see a red indicator window, it indicates that the surge protector has malfunctioned and can no longer provide protection. AD series indicator lamp uses high brightness pure color LED chip as light source, long life, low energy consumption, small size, light weight, head style diversity, high brightness, good reliability, beautiful shape and exquisite manufacturing, suitable for power, telecommunications, machine. Single light, 230AC/DC, blue Light signal 70mm, 230V, 1 mode, p/max 250m count, 1 lamp red. The surge protector is equipped with a status indicator window, usually displaying two states: green and red. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. It protects cables and devices from overload, disconnects circuits in the event of a fault and thus guarantees maximum safety. STAHL's lighting and heating circuit distribution systems are available; coupled with the customer-specific options on offer, these systems are incredibly versatile.
