## Do I NEED a switch aggregation? : r/UNIFI

No, you probably don't need a aggregation switch. Most of your traffic is probably between your clients and the internet as opposed to from client to client/server all within the same network.

## Ideal Network Configuration

All floors have two switches from where the uplinks goes to one switch (aggregator / core switch) to which untangle ( UTM) is connected. Untangle has 3 wan links that is used in load

## Aggregation Switch

An aggregation switch refers to a type of switch used to connect multiple ToR switches to a core switch/router in a cloud data center network. It enables high-bandwidth aggregation ports to be

## Everything You Need to Know About Aggregation Switch

Their aggregation switches are a set of managed, high-bandwidth switches that specialize in optimizing data transfer speeds and reducing network

## **What Is an Aggregation Switch and How It Works**

An aggregation switch sits in the middle tier of a network, collecting traffic from multiple smaller access switches and funneling it upward to the core. In a traditional three-tier network
