

Do outdoor armored optical cables contain steel wires

Overview

These ruggedized UV-rated cables contain two strength elements made from high-grade steel wire and a steel jacket molded in a helical pattern to protect the inside fibers. 5/125 2: SM 9/125 3: MM 50/125 4: MM/OM3 9: MM/OM4 y, sheath 2: LSOH 3: PE zzz, fiber count 002 / 004 / 006 / 008 / 012 / 016 / 024 Max. Armored fiber optic cables are constructed with a helical stainless-steel tape over a buffered fiber surrounded by a layer of aramid and stainless-steel mesh with an out jacket. it was designed to provide additional protection to the delicate optical fibers inside, ensuring their performance and. It is widely used in environments where durability and resilience against external forces are.

Do outdoor armored optical cables contain steel wires

steel wire Armoured outdoor fiber optic cable

The loose tube design with and steel tape for provides stable performance over a wide temperature range and is compatible with any telecommunication grade
