

Does Cisco support photoelectric conversion modules

Does Cisco support photoelectric conversion modules

Cisco Optics , Transform Your Network

Deploy high-density transceiver modules for data center AI/ML applications and high-performance computing networks.

Co-Packaged Optics in Modern Data Centres

These modules convert electrical signals from the switch ASIC into light and back, with each link carrying tens or hundreds of gigabits per second.

[Read More](#)

What Is An Optical Module?

An optical module converts electrical signals to light for fast, reliable data transfer in networks, essential for cloud computing, telecom, and data centers.
