

Does the 5-port gigabit switch include an optical port

Overview

The SFP port is commonly found on Gigabit Ethernet switches and is primarily used for fiber optic device connections or for uplinking 1G switches to aggregation/core layer devices, providing higher-bandwidth links. MULTI-GIG PORT: Intelligent port that automatically adapts to the speed required and can provide 100M / 1G and 2. Tenda SG105, 5 Port Gigabit Switch, Unmanaged Home Ethernet Switch, Office Ethernet. Its maximum advantage is bringing many computers, printers, and even IP cameras online so they can communicate and share data. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and environmental factors.
