

Does the Xiaomi Router 3G support 500Mbps fiber optic internet

Overview

Yes, the Xiaomi Router Be5000 is fully compatible with fiber optic internet connections. Like its predecessor, the scope of delivery only includes the router, a power supply with NEMA-1 plug (12V - 1. The Reyee Whole Home Mesh WiFi System AX3200 delivers a high-performance Wi-Fi 6 experience with dual-band speeds of 2400Mbps on 5GHz and 800Mbps on 2. Its eight omnidirectional antennas with high-power amplifiers provide extensive coverage up to 6000 sq. 4GHz and 2x5GHz, with maximum combined speed of up to 9000Mbps, OFDMA MU-MIMO 4x4, 1GB memory, simultaneous connection of up to 248 devices. Many Internet Service Providers (ISP) provide modem / router combos, so you get connection that way My ISP does the same, but it gets decently hot and struggles when there's a lot of devices. Does Mi Router 4A / 4A Gigabit Edition support fiber optic modems?

As far as I am aware, modems convert the noise (cable/dsl/dialup) to something computers/routers can interpret or distribute; therefore, I would think any router is compatible with any modem via their Ethernet ports.
