

E2000 Integrated Fiber Fusion Tray

Overview

OPTICOM® E2000 fibre optic products provide a flexible and modular system with components for fibre termination, splicing, and patching in all applications with superior patch field access, easy moves-adds-changes, and simple installation. 46 variants across 6 product families — from rigid 1U Fusion Boxes to extendable Future Boxes, 4U carrier systems and wall distribution modules. All with E2000 automatic laser safety, IEC 61754-15 compliant, 5-year manufacturer warranty. The E-2000® connector, invented by DIAMOND, delivers unmatched reliability and precision in fiber-optic interconnects - making it the ideal choice for critical transmission points across telecom, industrial, medical, and more applications. Diamond has responded to this challenge and expanded the E-2000™ connector system to address these gaps, etc. The thumb-latch and frame are available in eight distinct configurations (shown in multiple-service patch facilities). Corning has a wide variety of hardware solutions to choose from to fit your cabling needs.

E2000 Integrated Fiber Fusion Tray

ICC Stackable Fiber Optic Splice Tray Closure - Holds

Description ICC's Fiber Optic Splice Tray is designed to organize and protect fusion splices in structured cabling systems. This model supports up to 24 fibers and
