

# **Electrical distribution box moved into cabinet**

## Overview

---

Placing a junction box inside a cabinet is permissible under certain conditions and regulations. However, it is crucial to prioritize safety and adhere to guidelines set forth by the NEC and local electrical codes. This seemingly simple task involves altering the home's permanent wiring system, a process that demands meticulous planning and strict adherence to electrical. It seems to me that the wires from the junction boxes will need to be routed from the 1-gang boxes behind the cabinet to inside the cabinet to connect to the LED power supply, where another junction box will make the connection.
