

Excessively high cable tray support

Overview

One of the most often occurring installation problems with cable trays is their sag. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resili- for each of these installation challenge-ience and safety. Cable Tray Installation Spacing plays a huge role in the safety, efficiency, and reliability of electrical systems. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support.

Excessively high cable tray support

Cable Tray Support Solutions: Safety, Compliance,
