

Factory electrical box distribution box ground wire

Overview

26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. If you've ever found yourself scratching your head over whether that metal door on your distribution cabinet really needs a grounding wire, you're not alone. In factories, construction sites, and even commercial buildings, this question pops up all the time. Preparation: First, you need to prepare some necessary tools, including grounding wire, grounding rod, voltmeter, insulating gloves and insulating tools. This guide covers essential NEC Article 250 requirements for industrial facilities, OSHA grounding standards and compliance strategies, and practical testing and maintenance procedures that ensure your grounding system performs when it matters most.
