

Fiber Optic Cable Splice Terminals

Overview

A fiber access terminal (FAT) is a compact fiber management box that mechanically protects fiber management systems with splicing, patching and integrating passive optic components. Multilink's Fiber Tap™ system creates an ideal fiber to the home (FTTH) solution for any network. These units are simple to service and connect in the field, shortening the instal. If you're a network provider looking to design or expand your network infrastructure, you need our outdoor fiber access terminals a.
