

Fiber Optic Sensor N13N

Overview

The FS-N13N optical fiber sensor is a cutting-edge device designed for high-precision measurement applications.) (When set to double, the number of interference-prevention units will be doubled.) *2 One or two more units connected: -20 to +55 °C (-4 to +131 °F); 3 to 10 more units connected: -20 to +50 °C. KEYENCE Fiber Optic Sensors: FS-N Series KEYENCE'S FS-N Series contains a multitude of innovative features; including one-touch calibration, dual digital display, automatic maintenance, and MEGA power mode, making them an industry leader in fiber optic sensing. The automatic maintenance function detects light intensity reduction due to dirt or misalignment, and returns the sensor to its original display state. Our market covers South East Asia: Vietnam, Thailand, Malaysia, Kampuchea, Burma, Bangladesh, Sri Lanka; The Middle East: India, Pakistan, Iran, Dubai, Syria; Africa: Morocco, Algeria, Egypt, Nigeria, Kenya; Europe: Spain, Portugal.

Fiber Optic Sensor N13N

Fiber Optic Sensors: Types, Working Principle

Explore fiber optic sensors: their working principles, types (intrinsic, extrinsic, hybrid), and diverse applications in mechanical, chemical, and structural health monitoring.
