

Fiber optic cable entry point into the equipment room

Overview

The communications connection to the outside world comes into the building through what is called a "service entrance" and is terminated in the main "equipment room" or "main cross connect" which houses the electronic communications equipment which connects to the outside world. Fibre based building connectivity is not new, building entry points are not new so what is new that warrants another application note on the subject. Buildings and their communications requirements have never been so diverse which in turn requires an almost infinite degree of flexibility and. Its equipment is critical to the security, safety, and reliability of your organization. Fiber optic networks allow transmission distances of hundreds of kilometers and have an almost infinite capacity.

Fiber optic cable entry point into the equipment room

High-Quality Fiber Optic Terminal Boxes

Fiber Optic Terminal Box (FTB) is a compact fiber optic management product. It is widely used for FTTx cabling of optical fiber and cable, providing an ideal solution
