

# Fiber optic splice closure gpj-fz02

## Overview

---

Hoop is used to fix and seal FOSC cover and base, and its installation is quite simple. GPJ-F is provided with 6 fiber cable inlet/outlet ports and sealing is achieved by tightening nut after inserting fiber cable. CommScope addresses these challenges with a comprehensive family of fiber splice closures that prioritize essential criteria: reliability, installability, flexibility, and speed of deployment. Trunk and Feeder Network Solutions: These closures are designed for robust performance in the backbone of. Used for the outdoor connection between optical distribution cable and optical in room cable. GPJ(04) series provide suitable for cable whose diameter is 10-23mm, they can be used in aerial, duct, and direct buried application; These products are made of the high.
