

Finland Thermal Channel IP54

Overview

Thermal Channel Technologies Oy, a VTT spin-off company, has developed a cooling solution that is considerably more efficient than current commercial solutions, used e. in the charging stations of electric cars, 5G base stations, smart grids, and high intensity LED luminaires. Its patented NEOcore modules exploit a sealed two-phase cycle to deliver cooling performance up to ten times greater. Our product range includes suitable products for heating and cooling networks, hot water distribution, and frost-free water supply lines. Put simply, insulation keeps hot things hot and cold things cold. But things really start to get interesting when we consider the. The company's expertise and global presence enable it to meet diverse client needs across various industries.

Finland Thermal Channel IP54

NEOcore Technology

At the heart of NEOcore is its integrated 3-in-1 thermal channel, combining three key components for seamless heat transfer: 1. Large Evaporators: Ensures even cooling across the entire module,
