

Garden Landscape Distribution Box Grounding

Overview

With this convenient distribution box with a standard pin cable you can connect up to 4 grounding products with a grounded wall socket or a grounded extension cord in a grounded wall socket. The black Outdoor Ground Box cover assembly is prewired on a single circuit with (2) 20A weather resistant duplex receptacles. However, in an indoor or container garden, plants lose this natural ground connection. This small green electrical box is specifically designed to manage and control the low-voltage landscape lighting in your yard or garden.
