

High-power power supply for AI servers

Infineon 12-kW High-Density PSU Reference Design

A new 12-kW reference design for high-performance power-supply units (PSUs) from Infineon Technologies is specifically designed for AI data centers and server

Nvidia B300 AI server prices double in China amid US curbs

Nvidia's high-end B300 AI servers are now selling for about \$1 million in China, nearly double their US price, as tighter US export controls and smuggling crackdowns choke grey-market

Why liquid cooling will dominate AI data centres in 2026

As AI power demands surge into 2026, liquid cooling is becoming the essential technology keeping data centres efficient, stable, and future-ready.

Axe series 2U GPU Servers

The AXE-7220 series comprises compact 2U short-depth AI GPU servers built for high-performance edge computing. Each model integrates powerful single-socket

[Read More](#)

High-Density Power for the AI Revolution

An AI data center server power supply built using devices such as GaNSafe can achieve significantly better performance and support enhanced system safety and reliability versus a unit that utilizes

Bloom Energy offers 800V DC power solutions for AI

As AI data center energy consumption continues to surge, Nvidia has introduced a high-voltage direct current (HVDC) architecture aimed at reducing

[Read More](#)

AI data center growth: Meeting the demand , McKinsey

But even if all currently known plans are delivered on time, there could still be a data center supply deficit of more than 15 GW in the United States alone

[Read More](#)

Meeting the Demanding Energy Needs of AI Servers with Advanced

Explore how innovations in power devices, gate drivers, and DSP-based controllers tackle AI servers' high energy demands, optimizing efficiency in data centers.
