

How long is the fiber optic cable in the Philippines

Overview

It will stretch from the Bicol province in Central Philippines through Visayas and Mindanao in the southern part of the country. Under Phases 2 and 3 of the NFB, approximately 1,800 kilometers of new fiber optic cable have been laid out, expanding the high-speed digital infrastructure to Cagayan Valley, CALABARZON, Bicol, Eastern Visayas, and Mindanao. This is attributed to the combined efforts of ISPs and government agencies to expand coverage and promote the transition from legacy fixed-line technologies to faster fiber connections. A cost-effective and disaster-ready solution to keep your business connected—no matter what happens. Globe has successfully upgraded 450 cities and towns across the Philippines to fiber-optic technology, strengthening its commitment to providing top-tier connectivity to its wireline customers while promoting sustainability through energy-efficient, future-ready solutions.
