# How many kilometers is a standard optical cable reel

## Overview

---

Table 11-2: Fiber Loss Budget Calculation  
Fiber cable is normally shipped with a maximum reel length of 15,000 feet (or 4. <https://> I usually assume 4-5 splices per 40000feet As others have said, the length of the spool is typically not your limiting factor. Used by electric utilities on transmission lines with the voltage of 35 kV and higher for creating optical communication lines and protecting the power lines from lightning strikes. It is used with industrial jumpers, network cables, audio and video cables, and offers significant cost savings through direct cable integration into reel.

## How many kilometers is a standard optical cable reel

---

### Several Steps For On-site Cable Reel Testing

Generally, optical cable manufacturers will do a test before the product leaves the factory, but in order to ensure that the optical cable is not
