

How much does a Central Asia optical cable cost

Overview

Total project estimate: about \$1,000-\$1,600 including labor and basic terminations. It sounds simple, but if you have searched online, you know that finding a static fiber optic cable price list is almost impossible. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. On the import side, Uzbekistan constituted the largest market, with imports valued at \$22 million, representing 48% of total.
