

How to check the length of a cable tray bend

Overview

Mostly all elements in Revit, cable trays included, have an instance parameter called "Comments" that is blank by default. How to calculate cable tray bends?

Calculate the minimum required bend radius by multiplying the cable's outside diameter by its bending factor (e. Great if you are new or just forgot how to do it, this easy to follow guide makes it so simple. Use this tool to estimate sloped section length, horizontal run requirement, cut marks, and installation feasibility. Pierre Navarra of Sona-Architecture solved how to get BendRadius center of cable tray fittings with lots of valuable help from Moustafa Khalil from SharpBIM coding and Mohamed Arshad K: Question: I need to get the length of a cable tray fitting.

How to check the length of a cable tray bend

Cable Bending Radius in Cable Tray , Information by Electrical

You can get different radius bends for tray. Here's a snip of some aluminum, horizontal bend options from Eaton's B-line catalog. I think 24" is typically the minimum, so your 12.2" bending
