

# **How to configure an automatic DTU splitter for power distribution**

## How to configure an automatic DTU splitter for power distribution

---

### Distribution Automation

ABSTRACT: Distribution automation (DA) is a Smart Grid technology that can be implemented on the electric grid's distribution system of local power lines and neighborhood substations. It often offers

## Power Distribution Unit

Power originates from the main power supply, is transferred through central UPS and sub-distribution systems, and is supplied to socket systems in the IT racks - the PDUs (power distribution units). The

## **What is a power distribution unit (PDU)?**

A power distribution unit (PDU) is a device for controlling data center electrical power. The most basic PDUs are large power strips without surge protection. They are designed to provide
