

# **How to connect the connector at the fiber distribution box**

## Overview

---

First, connect each pre-terminated fiber optic cable to the adapter panel separately, making sure the ports correspond one-to-one; then fix the fiber optic adapter panel to the front panel of the distribution box with the bend radius control clip. Fiber distribution boxes represent a critical component in modern telecommunications infrastructure, serving as the connection point between main fiber optic cables and individual subscribers. As networks expand and more homes and businesses require high-speed connectivity, skillfully installing and managing an FDB becomes essential knowledge for any.
