If you're planning on installing solar panels, high-power appliances, or just have blown a fuse, it's important to know whether or not you have a single-phase or 3-phase power supply. Generally, most residential homes use single-phase circuits and commercial properties with high electrical demands use 3-phase. Open your fuse box and find the main switch, which is often labeled. If there are 3 switches, it's a 3-ph. Check your electrical meter for a label. It might say "Mono-Phase," or "1-Phase" if it's single phase, or "Tri-Phase" or "Polyphase" if it's 3-phase.
