

How to view the connected IP address on a Huawei switch

Overview

You can run the `display arp` command to view IP addresses and interfaces of servers directly connected to a switch. Is there a way I can find the list of IP addresses connected to a switch (may be Unix command), so that I can visit each desk, run a command, and check all the active IP addresses (computers) connected to that switch, and based on that I can find out to which switch that specific IP address is. The method for starting and stopping viewing logs on a Huawei backbone switch depends on the. For example: Replace USERNAME with the new username, set the password, define service-type (telnet, ssh, etc.
