

# **Huawei 20km optical module**

## Overview

---

This Huawei® compatible SFP+ transceiver provides 10GBase-LR throughput up to 20km over single-mode fiber (SMF) using a wavelength of 1310nm via an LC connector. If the SFP-10G-ER-1310 is connected to a 10Gbase-ER standard optical module (1550nm, 10GE, 40km), the maximum transmission distance is only 20km due to different specifications such as wavelength and receiving sensitivity. Buy it now and enjoy risk free purchase with fast worldwide delivery from GenuineModules. An SFP interface on networking hardware is a modular slot for a media-specific transceiver in order to connect a fiber-optic cable or. It provides a wide range of Interface Type, including LC, SC and FC, suitable for both Data Center and Telecom applications. Operating over a single fiber strand, it significantly reduces fiber usage and infrastructure cost, making.
