

Huawei AP Fiber Optic Panel

Huawei AP Fiber Optic Panel

Indoor Access Points

AirEngine 5573-21 Huawei AirEngine 5573-21 is a next-generation indoor access point (AP) in compliance with Wi-Fi 7 (802.11be). It can simultaneously provide

Optical Fiber

A single-mode optical fiber and a multimode optical fiber have the same appearance but different colors. A single-mode optical fiber is yellow and a multimode optical fiber is orange.

Fiber Coiling (In a Panel Fiber Management Tray)

Secure the AP to the mounting bracket by using the two grooves on the side and the guide rail on the rear of the fiber management tray, and tighten the screws on the side.

Installing Optical Transceivers and Connecting Optical Fibers

Before connecting optical fiber cables, read the following precautions: Do not overbend optical fibers, and the radius should not be shorter than 40 mm. Do not bundle the optical fibers too tight.

Assembling a Hybrid Cable 2.0

After hybrid cables 2.0 are made onsite, you are advised to use a red pointer and an optical fiber adapter to check whether optical fibers are broken or not. When routing a hybrid cable 2.0, coil the excess

Fiber to The Room (FTTR) Solution

The Huawei FTTR solution uses dedicated pipe routing tools, innovative micro optical cables, and transparent optical cables, which are easy to be routed through pipes without fiber splicing.
